Plaintalk 1.4.1: PostScript Error When Printing Read Me (10/95)

Article Created: 20 September 1995
Article Reviewed/Updated: 9 October 1995

TOPIC ---

I am unable to print the "Using Speech Recognition" ReadMe file included with
the Plaintalk 1.4.1 software I downloaded. I have tried several different
versions of the LaserWriter driver and different computers but I get a
Postscript error in each case.

DISCUSSION --

There was a problem with one of the graphics imbedded in the "Using Speech
Recognition" ReadMe file that was posted to online services from August 17, 1995
through October 5, 1995. A corrected ReadMe File was posted October 5, 1995.

If you are unable to download the new corrected ReadMe file, you can open the
old document with a word processing program other than SimpleText and it will
print fine.
