PowerBook File Assistant: Requirements for Installing (6/93)

Article Created: 7 June 1993

TOPIC ---

This article tells you what software File Assistant installs, and what you
need to install it.

DISCUSSION --

For further information on PowerBook File Assistant, please refer to the
article titled "Assistant for PowerBooks: Software Components" also located
in the Technical Information Library.

Requirements

To use the PowerBook File Assistant, you need:

• A PowerBook computer with at least 4MB of RAM

• System software version 7.0 or later

• System software version 7.1 or later is required to link files and
  folders by dragging them into the synchronization window.

• A hard disk drive

Installing

You install File Assistant software on your hard disk using the Installer.
Use Easy Install to install all of the software:

• The PowerBook File Assistant
• The Assistant Tool Box, and
• The system software that lets you drag icons from the Finder to the
  PowerBook File Assistant Setup window (requires System 7.1 or later).

Use Customize to select specific items you want to install.
