PowerBook File Assistant: Data Can't Be Opened (7/95)

Article Created: 10 March 1995

Article Reviewed/Updated: 20 July 1995

TOPIC -----

When I try and run PowerBook File Assistant, I get a message that says "The file assistant data can't be opened." I used PowerBook File Assistant yesterday. What's wrong?

DISCUSSION-----

The file assistant data has become corrupted. You can either restore it if you have made backups or simply throw it away and recreate it. "File Assistant Data" can be found in the preferences folder, in the system folder.

Article Change History:

20 Jul 1995 - Corrected minor typo.
