Substitution Fonts For Acrobat Or Adobe Type Manager (5/96)

Article Created: 28 May 1996

TOPIC -----

I just installed Quick Draw GX on my PowerBook 5300 and now when I start up I get a message that says "The Substitution fonts necessary for Acrobat or Super Adobe Type Manager are missing. Please reinstall either software package". What does this mean and what should I do to correct the problem?

DISCUSSION -----

You need to run the Acrobat installer. It is located on the Hard Disk in the following location: Applications *f* -> Adobe Acrobat Reader 2.0.*f*. The icon labeled AcroRead.Mac is an installer. Double click it to install the required fonts. After the installation, restart the PowerBook and you will not get the error message any longer.
