Lex Compiler for Macintosh OS

Article Created: 18 April 1989

Article Last Reviewed: 22 May 1992

Article Last Updated: 22 May 1992

TOPIC -----

I am working on projects like decision-support systems and I need a lexical compiler or other tool for lexical analysis for the Macintosh operating system.

DISCUSSION -----

Abraxas sells an MPW tool called MacYACC which is a complete language development environment and contains a lexical analyzer. For more information about the latest version of this package contact the company. Search on "Abraxas" for vendor information.
