## Prototyper 2.1: Using With LightSpeed Pascal 3.0

This article last reviewed: 12 June 1990

TOPIC -----

In a development environment, will "Prototyper" take advantage of the object-oriented programming capabilities of the latest release of LightSpeed Pascal 3.0?

DISCUSSION -----

The current version of Prototyper, version 2.1, was released before LightSpeed Pascal 3.0. The publishers, Now Software (formerly SmethersBarnes), state that Prototyper 2.1 does not support any of the object-oriented programming features of the LightSpeed Pascal product. However, the code generated by Prototyper can be compiled by LightSpeed Pascal 3.0. For more details, search the Technical Info library under "Now Software."
