Macintosh Debugger

This article last reviewed: 5 October 1989

MacsBug v. 6.1 supports the Macintosh Plus, Macintosh SE, Macintosh SE/30, and the Macintosh II family. MacsBugs is compatible with all Macintosh monitor configurations and all versions of Macintosh System Software, including Multifinder. Version 6.1 of MacsBug does not work with the 64K ROMs (Macintosh 128K and Macintosh 512K) or the Macintosh XL.

MacsBug is available from APDA. You must acquire a license from Apple Software Licensing before including MacsBug in a shipping product.
