Standard Resource Types: Reserved Resource Type Names (7/94)

Article Created: 19 July 1994

```
TOPIC -------------------------------------------------------
```

The following standard resource types have been defined (System file 4.1 or later). All-uppercase resource types are listed first followed by all-lowercase resource types.

Uppercase and lowercase letters are distinguished in resource types. You can use any four-character sequence, except those listed below, and those sequences consisting entirely of lowercase letters (reserved by Apple), for resource types specific to your application. There's no need to register your resource types with Apple since they'll only be used by your application.
