QuickDraw GX: Multi Page Printing on One Sheet of Paper (2/95)

Article Created: 18 August 1994

Article Reviewed/Updated: 14 February 1995

TOPIC -----

I just installed System 7.5 and QuickDraw GX and would like to print multiple text pages on one sheet of paper. Using the Layout feature in the Page Setup dialog box of the LaserWriter 8.x driver I was able to do this.

How can I accomplish this with System 7.5 after QuickDraw GX is installed?

DISCUSSION -----

There are two methods to print multiple text pages on one sheet of paper.

An extension to QuickDraw GX called Pierce Paper Saver can be installed. Pierce Paper Saver is included with the System 7.5 Personal and Group Upgrade Kits.

If you do not have the Pierce Paper Saver printing extension installed, the following procedure will allow you to utilize the LaserWriter 8.x multi page printing feature while running System 7.5:

Step 1

Make sure you have installed GX Helper via the Custom Install of QuickDraw GX.

Step 2

Remove all old LaserWriter drivers with the exception of the 8.x version.

Step 3

While in your application, under the Apple menu, select "Turn Desktop Printing Off."

Step 4

A dialog box will appear asking you to confirm your selection, select OK.

You will now be using the LaserWriter 8.x driver and have the ability to use all the features of the 8.x driver.
