TOPIC ---

It appears that the latest QuickDraw GX 1.1.2 does not retain the positions of the desktop printer icons on the Finder Desktop like QuickDraw GX 1.1.1 did. How can I fix this?

DISCUSSION --

This is a known problem with QuickDraw GX 1.1.2, and will be fixed in the next major release of QuickDraw GX.

Workaround

Fortunately, there is a quick workaround for this problem. Follow these steps:

Step 1

Starup with Extensions off.

Step 2

Move the desktop printer icons to where you want them on the desktop.

Step 3

Restart

The desktop printers should remain where you have placed them.
