QuickDraw GX: Print Spooler Patch Read Me File (10/95)

Article Created: 10 October 1995

TOPIC -----

This article contains the ReadMe file included with the QuickDraw GX Print Spooler Patch posted online.

DISCUSSION -----

About the QuickDraw GX Print Spooler Patch

The QuickDraw GX Print Spooler Patch fixes a problem when trying to print to AppleShare and Novell Netware print spoolers. This application makes changes to the QuickDraw GX extension and the LaserWriter GX printer driver. You must first make copies of the QuickDraw GX and LaserWriter GX files, and then run the patcher on the copies. Once the files are updated, you need to drag the original files in the Extensions folder to the Trash, and drag in the new updated files.

NOTE: You will not be able to "Empty Trash" until the computer is restarted.

Disclaimer

This patch is provided as a way to allow people to use the latest versions of QuickDraw GX with AppleShare and Novell Netware print spoolers. This patch is not officially supported by Apple Computer, but problems encountered while using print spoolers with QuickDraw GX and this patch can be reported by e-mail to reigel@eworld.com. These problems will be fixed in an upcoming release of QuickDraw GX.

Warning

This patch cannot work properly while virus detection software is running. Please make sure that you have disabled any virus detectors before applying the patch.

About this patch...

This patch application was made with ResCompare, a free resource comparison and patch generation utility. ResCompare can be FTP'ed from most Macintosh archive sites. Send e-mail inquiries regarding ResCompare to Michael_Hecht@mac.sas.com.
