## System 7: Sharing Applications

Article Created: 5 March 1991

### Article Change History

-----  
08/24/92 - REVIEWED

- For technical accuracy.

### TOPIC -----

Can I share applications with System 7?

### DISCUSSION -----

Yes. You can share applications in two ways:

- by sharing the folder that contains the application, so that multiple users can access it; and
- by sharing the program directly for access by remote program linking.

If you share the program by sharing the folder that it is in, then you must be aware of two issues:

- Some applications are not multi-user or AppleShare-aware and so cannot be used by more than one person at a time.
- You must adhere to the software license agreement provided with the application. Most applications only allow one user per copy.
