## System 7: The Desktop Button Replaces the Drive Button

Article Created: 8 March 1991

### Article Change History

08/24/92 - REVIEWED

- For technical accuracy.

### TOPIC

What happened to the "Drive" button in the Open and Save dialog boxes?

### DISCUSSION

The Drive button in the Open, Save, and Save As dialog boxes has been replaced by the "Desktop" button. When you click the Desktop button, you will see all of the hard disks, floppies, file servers, and folders that you have on your Macintosh desktop. To move to a specific disk, you can go directly to the disk you want, without having to move sequentially from one disk drive to the next.
