           • For technical accuracy.

TOPIC ---

Do you know of a PostScript file download utility that works with System 7
and the System 7 LaserWriter drivers? SendPS version 2.1, doesn't work
with the new drivers. This is more important than ever now that we can
save a PostScript file from the Print dialog box.

DISCUSSION --

The new LaserWriter Utility program can download PostScript files to a
LaserWriter via an option in the Utilities menu.
