System 7: Ready,Set,Go! Compatibility

Article Created: 25 June 1991

Article Change History

09/02/92 - CORRECTED

- Spelling of product name.

TOPIC -----

Is Ready,Set,Go! 4.5 fully compatible with System 7?

DISCUSSION -----

Ready,Set,Go! 4.5a, which is listed as fully compatible in the "System 7.0: Compatibility With Selected Hardware and Software" booklet has some compatibility problems with printer drivers later than 5.2 (System 7 drivers are 7.0).

Non-PostScript pen lines and fills will not print and may result in the error message "Undefined error, Command-S 8. A PostScript error has been generated by the LaserWriter extension file. The document is OK but cannot be printed." PostScript pen lines and fills which are located to the far left of the Ready,Set,Go! menu work fine.

LetraSet will not be updating Ready,Set,Go! 4.5a, but will continue to support the product. They recommend Design Studio 2.0 as an upgrade. Copyright 1991, 1992, Apple Computer, Inc.
