## System 7: System Magic Works On Folders

Article Created: 2 November 1992

TOPIC -----

Will the System magic work on folders dragged to the System Folder?

DISCUSSION -----

YES, the System magic will work on folders! Just drag a folder full of fonts, suitcases, control panels, or extensions and the System will route the items to the appropriate subfolder. It will look one level deep.

NOTE: If the folder contains only suitcases, after moving the fonts and DAs you'll see an error message for each suitcase and folder. The message says that the item couldn't be deleted because it contains items that are in use. Then it deletes the suitcases, but the folder remains.
