System 7: and AppleShare File Server (v 2.0.1)

Article Created: 8 March 1991

Article Change History

09/15/92 - UPDATED

- For AppleShare 3.0.

TOPIC -----

Should I install System 7 on my AppleShare File Server (version 2.0.1)?

DISCUSSION -----

No. Your AppleShare File Server (version 2.0.1) is ready to use as is with System 7 clients. If you want to install System 7 on your server, then upgrade to version 3.0 of AppleShare.

If your server is connected with EtherTalk, you may want to upgrade the EtherTalk driver for Phase 2.

Do not upgrade the System Software on your AppleShare File Server (version 2.0.1) to System 7 unless you are also upgrading to AppleShare 3.0.
