### TOPIC -----

Must I buy a System 7 upgrade kit or can a dealer copy the disks for me?

### DISCUSSION -----

System 7 offers so many new features and capabilities that many users will want to have the System 7 User's Guides and the information offered in the System 7 Upgrade Kits. These kits include Macintosh System Software 7, reference manuals, and many extra features.

However, as in the past, some dealers may make new versions of System Software available to customers by duplicating the software onto the customer's disks.

System Software 7 is also available through users groups, electronic bulletin boards, individuals, and AppleLink.
