LaserWriter Driver 7.2: Setup Button in the Chooser

Article Created: 29 March 1993

TOPIC: -----

After installing the LaserWriter Driver 7.2, I noticed a new feature, a "Setup" button in the Chooser. What's the purpose of the Setup button?

DISCUSSION: -----

The LaserWriter Driver 7.2 Setup feature queries the printer for information. Specifically, it checks the printer model, the paper source (Built-in trays, 75-envelope feeder or optional 500-sheet tray), and imaging options which are available for your printer. It was put in place to determine what options should be presented in the Print dialog box.
