System 7 Pro: Installs Older Version of Scrapbook (2/94)

Article Created: 23 February 1994

TOPIC -----

Does System 7 Pro install the latest version of the Scrapbook?

DISCUSSION -----

No, System 7 Pro installs version 7.1 of the Scrapbook desk accessory. It installs this version even though version 7.1.2 is found on the QuickTime 1.6.1 disk included with System 7 Pro.

System 7 Pro doesn't install the latest version of the Scrapbook because the current Installer script requires that you manually install the Scrapbook file to retain its contents.
