PowerShare: How to Move Catalogs and Mail Servers (7/94)

Article Created: 6 July 1994
Article Reviewed/Updated: 8 July 1994

TOPIC --

I have several hard drives in my PowerShare Server's SCSI chain. How can I move
my PowerShare Catalog and Mail Servers from the current PowerShare hard drive to
one of my other hard drives?

DISCUSSION ---

The steps for doing this are as follows:
1) Move the PowerShare Catalog Data and the PowerShare Mail Data folders to
   the new hard drive.
2) Delete PowerShare Catalog Prefs and PowerShare Mail Prefs from the
   Preferences located in the System Folder of the Startup Disk.
3) Launch the PowerShare Catalog Server.
4) When you launch PowerShare Catalog Server you will get a dialog box that
   says, "PowerShare cannot locate some of its configuration files." Click
   the "Restart" button in this dialog box.
5) Next you will get a dialog box that says, "The PowerShare Catalog Server
   cannot find its data folder." Select the desired hard drive from the pop-up
   menu in the dialog box.
6) Repeat steps 3-5 for the PowerShare Mail Server.
