DeskWriter and System 7.1: Font Placement (5/93)

Article Created: 25 May 1993

TOPIC -----

Where do I place my DeskWriter fonts in System 7.1?

DISCUSSION -----

According to Hewlett Packard (HP), the DeskWriter fonts which include CS Courier, CS Symbol, CS Times, and CS Triumvirate reside in a folder named "DeskWriter Fonts" at the root level of the System folder, not in the Fonts folder. This applies to HP driver versions prior to 3.1.

Versions 3.1 or latter of the HP software will create a folder named "HP Folder" or "HP Fonts Folder" that resides in the Preferences folder under System 7.x.

HP users can also remove their HP fonts entirely and use the TrueType fonts that are built into System 7. To use TrueType fonts or Adobe Type Manager fonts, change the DeskWriter driver Page Setup options as follows:

Version 2.2: Turn off "Font Substitution" and "Use High-Quality Printer Fonts".

Version 3.1 or latter: Turn off "Font Substitution" and "Use HP Fonts", then select "Save as Default".
