## Macintosh LC 520: LC III System Disks Won't Work (7/93)

Article Created: 28 July 1993

TOPIC -----

If the system on an LC 520 crashes, can I use the system disk set from an LC III accessory kit? Are the system enablers the same?

DISCUSSION -----

No, the Macintosh LC 520 won't work with the Macintosh LC III system disk set, because the 003 enabler is what the Macintosh LC III uses and the 403 enabler is what the LC 520 uses. Even though the Macintosh LC III and the 520 are similar in design the 003 enabler won't drive the Macintosh LC 520. Copyright 1993, Apple Computer, Inc.
