System 7: Limits on Application Memory Allocation

Article Created: 19 October 1992

TOPIC ---

I would like to increase the maximum memory for an application to more than
99MB via "Get Info" under System 7. Apparently the maximum memory
currently is 99MB.

How can I increase the maximum memory to more than 99MB for an application?

DISCUSSION --

The current or "preferred" memory size assigned to an application (via Get
Info) is limited to:

```
System 7 or 7.0.1      System 7.1
-----------------      ----------
less than 100,000K     1,000,000K
```

We recommend that you upgrade to System 7.1.
