At Ease 1.0: Animation Locks Up in Mouse Practice

Article Created: 1 December 1992

TOPIC -----

I have a problem with "Mouse Practice" (At Ease 1.0). After running a while, the animation locks up when I click on the Sea Horse during the underwater sequence.

Configuration:

- Macintosh LC II 4/40
- 256 colors on a 12-inch display
- System 7.0.1

DISCUSSION -----

This is a problem with the amount of memory allocated to the application. If you look at Get Info under the File menu for the application, you'll find the allocated memory is 5000K. It's set this way from the factory. Lower it to the recommended 2048K. This has cleared up the problems that we have seen.
