System 7: Error When Copying Disk Image to RAM Disk (7/96)

```
Article Created: 21 January 1993
Article Reviewed/Updated: 22 July 1996

TOPIC -------------------------------------------------------------

I am experiencing some difficulty copying a floppy disk image to a RAM disk. If
the RAM disk size is 1 MB to 2 MB, the computer attempts to erase the contents
of the RAM disk volume, and then reports an error -35.

DISCUSSION --------------------------------------------------------

This error occurs because the Finder was written under the assumption that any
volume with fewer than 2 MB must be a floppy disk. However, this issue has been
resolved in System 7.5.2 and later.
