Article Last Updated: 2 June 1992

TOPIC -----

How do I revert to System 6 after installing System 7?

DISCUSSION -----

Before upgrading to System 7, back up your hard disk using any of backup and restore products available for the Macintosh. At a minimum, back up your System folder.

Please do not try to install System 6 over System 7. Instead, follow these steps:

- 1) To remove System 7 from your hard disk, boot from a System 6 "System Tools" floppy disk and drag the System 7 "System Folder" from your hard disk into the Trash can.
- 2) Restore your System 6 "System Folder" from a backup, or install from the System 6 "System Tools" floppy disk.
