System 7: Installing AppleShare without Installing File Sharing

Article Created: 16 August 1991

Article Change History

09/14/92 - REVIEWED

- For technical accuracy.

TOPIC -----

Can I install AppleShare software on my Macintosh without installing the File Sharing software at the same time?

DISCUSSION -----

To install AppleShare software without installing the File Sharing software, use the Installer's "Customize" option and select either "System Software for Any Macintosh" or "System Software for [your particular Macintosh model]."

Using the Installer's "Easy" option installs both AppleShare and File Sharing software.
