## System 7: Lost Get Info Comments

Article Created: 18 February 1992

### Article Change History

-----  
12/16/92 - UPDATED

- To report System 7.1 has the same problem.

### TOPIC -----

When I insert a floppy disk and choose Get Info, I can type comments. When I eject and reinsert the floppy disk, the comments are gone. I can also reproduce this by leaving the floppy disk inserted, using NoFinder to kill the Finder, and then relaunching the Finder. This is true for System 7.0 and 7.0.1 (both with and without Tune Up).

### DISCUSSION -----

This problem with SuperDrive (FDHD) disks has been reported to Engineering and to the System 7 team. We don't have a workaround yet but can duplicate it with System 7.0, 7.01 and 7.1.
