System 7: Removing Fonts and Sounds

Article Created: 17 July 1991

Article Change History

08/25/92 - REVIEWED

- For technical accuracy; edited.

TOPIC -----

A new feature of System 7 allows you to remove fonts and sounds by dragging the resource icon out of the open System file. This article details how to do this.

DISCUSSION -----

Fonts and sounds are removed by dragging them out of the System file.

- 1) Quit all programs that are currently open. You'll get an error message if you try to remove a font or sound when any programs (other than the Finder) are open.
- 2) Open the System file. This may take a few moments if the file is large.
- 3) Select the icon of the font or sound you want to remove.
- 4) Drag the icon out of the System file window. To discard the font or sound, drag it into the trash. To save it for future use, drag it anywhere outside of the System file.
