Macintosh: If TrueType INIT Is Scrambled at Startup

Article Created: 17 February 1992
Article Reviewed/Updated: 30 September 1992

TOPIC ---

I have a Macintosh LC, running system software version 6.0.7, and a
StyleWriter printer. At startup, the TrueType INIT is scrambled.

I trashed the System Folder, reinstalled the version 6.0.7 system software,
and removed all other INITs. I also ran Disinfectant 2.4 and rebuilt the
desktop, but I am still having the problem.

DISCUSSION --

Since we haven't had other reports of this problem, we suspect that your
version of TrueType is corrupted. Try installing TrueType from another
known-good disk.
