System 7.5: Old Enablers May Remain After Easy Install (2/95)

Article Created: 29 August 1994

Article Reviewed/Updated: 15 February 1995

TOPIC -----

After installing System 7.5 over my old System 7.1 folder, I noticed that some enablers remained in the system folder. Can I throw them away?

DISCUSSION -----

When selecting Easy Install from the System 7.5 Installer and installing over 7.1 systems, the installer will fail to remove the PowerBook 150 Enabler, the PowerBook 500 Series Enabler, and the Workgroup Server 9150 Enabler.

This is not a problem, as 7.5 will ignore the enabler. The enablers can be safely tossed in the trash.
