System 7.5: Network Startup Diskette for Net Installs (6/95)

Article Created: 09 January 1995
Article Reviewed/Updated: 14 June 1995

TOPIC ---

Is there a diskette image available which will allow me to mount an AppleShare
file server to perform a net install of software?

DISCUSSION --

The System 7.5 Group Upgrade CD will include a Disk Copy image of the Network
Access Disk which will have AppleShare, Ethernet, Chooser and Finder support.
This Disk Copy image can be found in the Administrator Tools folder, in the
Network Access folder on the CD.

This will provide customers with a disk that will start any Macintosh and let
them mount an AppleShare file server in order to "Net Install" system software.
There is no TokenRing support.

Article Change History:
14 Jun 1995 - Added information on which CD to find the Disk Image.
15 Feb 1995 - Reviewed for technical accuracy, revised System 7.5 keyword.
