System 7.5: Date & Time Problem with Adobe Illustrator (2/95)

Article Created: 1 September 1994

Article Reviewed/Updated: 15 February 1995

TOPIC -----

A problem has been discovered with Date & Time (aka SuperClock) on System 7.5 that will cause Adobe Illustrator to crash when printing to a LaserWriter IISC or Personal LaserWriter SC.

DISCUSSION -----

The workaround to this problem is to turn off the Menu bar clock before printing from Illustrator. The problem was discovered too late to include this information in the ReadMe file before System 7.5 shipped.
