System 7.5 MUK: MacLink®Plus Version 7.52 Read Me (2/95)

Article Created: 02 September 1994

Article Reviewed/Updated: 16 February 1995

TOPIC -----

The following article is the "MacLink®Plus Version 7.52 ReadMe" from the System 7.5 Multi-Pack Upgrade Kit.

DISCUSSION -----

MacLink®Plus Version 7.52
System 7.5 Upgrade Kit Installation Notes

The MacLinkPlus Installer

Just double-click on the MacLinkPlus Installer. It will check your system configuration, select the most likely installation options, and lead you through the installation process. Descriptive information is provided for each option, and you will have the opportunity to review, and if necessary, change the selected options.

Installing from a CD

The MacLinkPlus Installer suggests you install after restarting your Macintosh with Extensions turned off to avoid any conflicts with your existing Extensions.

If you wish to install with Extensions off and you are installing from a CD, you should first copy the entire "DataViz Translators" installation folder to your hard drive, then restart with your Extensions off. After you have restarted, open the installation folder from the hard drive and double-click the MacLinkPlus installer.

Special Considerations

There are special considerations to be aware of for certain translations, such as when translating between frame-based and flat word processors, or between 2-D and 3-D spreadsheets.

We strongly advise you to read the Read Me document that is installed in your MacLinkPlus folder, especially if you will be using files from one or more of the following programs: ClarisWorks; Lotus WK3; MacWrite Pro; Nisus; or WordPerfect 6.0.

The Read Me document is also available as "Late Breaking News" in your installer's completion window.
