System 7.5: Clean Install Fails with Sorry Button (2/95)

Article Created: 09 September 1994
Article Reviewed/Updated: 15 February 1995

TOPIC ---

If you attempt to perform a "Clean Install" with System 7.5 (Command+Shift+K at
the Easy Install dialog), you may get the "A clean install cannot be performed
on the 'disk name' " message with a "Sorry" button.

DISCUSSION --

This will occur if you do not have the blessed or active system folder on the
drive you are installing on. A clean install disables the active system folder,
so if the active system folder is not there the install will fail.

A workaround is to perform a standard install rather than using the
Command/Shift/K, clean, install procedure.
