System 7.5: Improper Shut Down Warning Dialog Box (9/94)

Article Created: 09 September 1994

Article Reviewed/Updated: 15 February 1995

TOPIC -----

After installing System 7.5, upon restarting my computer after a system error, I noticed that a dialog box warning me that my computer was not shut down properly appears. It only appears if I was unable to do a proper shut down of my computer.

How can I alleviate of this dialog box?

DISCUSSION -----

In the General control panel, under Shut Down Warning either select, or deselect the checkbox to turn the warning dialog box on or off.
