PowerTalk: There is No Custom Remove Option (2/95)

Article Created: 13 September 1994
Article Reviewed/Updated: 15 February 1995

TOPIC ---

This article describes how to remove PowerTalk from your system folder, because
there is no removal option in the PowerTalk Installer.

DISCUSSION --

When you install PowerTalk, which comes with System 7.5, you can only install,
there is no option for Remove or Custom Remove. The way to de-install PowerTalk
is to drag the 13 PowerTalk components from the System Folder to the Trash. By
removing PowerTalk you can reduce RAM requirements and increase hard disk
space.

If you have been using PowerTalk, be sure to empty your Mailbox and verify there
are no items waiting to be sent before you remove PowerTalk.

Here are all of the files and folders that need to be removed:

```
                                                     Component
                                                     ---------
Apple Menu Items (folder)
.   Mail and Catalogs (folder) ................................  1

Control Panels (folder)
.   PowerTalk Setup (control panel) ...........................  2

Extensions (folder)
.   AppleTalk Service (PowerTalk extension)....................  3
.   Catalogs Extension (system extension) .....................  4
.   Mailbox (system extension).................................  5
.   PowerTalk Guide (Apple Guide document).....................  6
.   PowerTalk Extension (system extension) ....................  7
.   PowerTalk Manager (system extension) ......................  8

PowerTalk Data (folder) .......................................  9

Preferences (folder)
.   AppleMail Letterheads (folder) ............................ 10
.   PowerTalk Setup Preferences (PowerTalk Manager document) .. 11
```
