PowerBook: Color Matching with External Monitor (2/95)

Article Created: 21 September 1994

Article Reviewed/Updated: 16 February 1995

TOPIC -----

Is there a way to see exactly how a presentation I create on my desktop Macintosh will appear when I transfer it to my PowerBook Duo 270c? I have had problems matching certain shades of blue in the past.

DISCUSSION -----

ColorSync 1.0.5, included with System 7.5, resolves this type of problem because it includes a ColorSync profile for the PowerBook Duo 270c.

ColorSync 1.0.5 is also available everywhere Apple post software updates.

These articles can help you locate the software update mentioned here:

- "Where To Find Apple Software Updates" -- Lists online services for free Apple software updates.
- "Obtaining Apple Product Support in the USA" -- Lists 800 numbers and online services for software updates, Apple support information, and a subset of the Apple Tech Info Library.
