System 7.5: Use DOS Mounter or PC Exchange? (2/95)

Article Created: 10 October 1994
Article Reviewed/Updated: 14 February 1995

TOPIC --

Is there a reason that I cannot use DOS Mounter with System 7.5? Does PC
Exchange offer any additional benefits over DOS Mounter?

DISCUSSION ---

Dyna Communications says that DOS Mounter is System 7.5 compatible. However,
Macintosh PC Exchange has been tested by Apple, and is known to work fine with
System 7.5. With DOS Mounter, we just have not seen any problems or problem
reports. Since Macintosh PC Exchange is now bundled with System 7.5, there is no
additional cost involved.

Macintosh PC Exchange 2.02 has the same feature set as DOS Mounter, so there are
no additional benefits other than cost.
