## System 7.5: Custom Install File Listing (2/95)

Article Created: 12 December 1994

Article Reviewed/Updated: 16 February 1995

TOPIC -----

We have a lot of customers that call wanting to know what the differences are between Easy install and the various custom install options available in System 7.5.

What files get placed on the hard drive for the 7.5 custom install system software options? If customers select minimal install for any Macintosh, how would the system folder differ from selecting system for any Macintosh?

DISCUSSION -----

To answer your question about when and why you would use the different options, I have included the information below.

Question: When do I use the different Custom Install Options?

Answer:

Minimum System for This Macintosh Only

-----  
Can be used for creating a System Folder that has a small RAM and hard disk footprint. Minimum System resources are installed.

Minimum System for Any Macintosh

-----  
Can be used for creating a universal System folder that has a small RAM and hard disk footprint. Minimum System resources are installed.

System for this Macintosh

-----  
Can be used for creating a custom System Folder that picks appropriate software for a particular Macintosh.

System for any Macintosh

-----  
Can be used for creating a Universal System Folder that picks all appropriate software for many different Macintosh models.

Finally, below is the information regarding System 7.5 and what is installed after custom installs. These installs were done on a Quadra 660AV with a clean hard drive using the System 7.5 Upgrade CD.

Question: What is installed with a System 7.5 Custom - Minimum Install for this Macintosh?

Answer: Minimum System Software This Macintosh

-----
