## System 7.5 Update 2.0: Energy Saver Update Not Installed (5/96)

Article Created: 6 May 1996

TOPIC -----

I have a Power Macintosh 7200/90 computer. I recently installed System 7.5 Update 2.0, but now I cannot open the Energy Saver Guide in the Energy Saver control panel. What's going on?

DISCUSSION -----

System 7.5 Update 2.0 does not install the latest version of the Energy Saver Guide, control panel, or extension when performing an "Easy Install." However, these files are correctly updated on Power Macintosh 7500, 8500, and 9500 series computers.

Use the System 7.5 Update 2.0 installer to Custom Install the update to Energy Saver 2.0.1 by following these steps:

Step 1

-----

Launch the System 7.5 Update 2.0 installer.

Step 2

-----

Choose "Custom Install" from the pop-up menu in the top left corner.

Step 3

-----

Under the Custom Install window, click once on the arrow to the left of "Control Panels", so the arrow points down.

Step 4

-----

Click once in the check box next to "Energy Saver".

Step 5

-----

Click the Install button to finish the installation.
