System 7.5.3: Revision 2 or Updated to Revision 2 (6/96)

Article Created: 03 June 1996
Article Reviewed/Updated: 6 June 1996

TOPIC --

I have a Power Macintosh 5400/120 computer, which came pre-installed with System
7.5.3. However, the About Box states that it is System 7.5.3, Revision 2. I have
another computer with System 7.5.3 installed on it, but it does not mention
Revision 2. What is Revision 2?

DISCUSSION ---

System 7.5.3 Revision 2 is a set of system software enhancements that improves
the reliability and performance for the certain Macintosh computers.

Computers that include System 7.5.3 Revision 2 pre-installed will display System
7.5.3 Revision 2 in the About Box. However, if customers install Revision 2 over
System 7.5.3, the About Box will display System 7.5.3, Updated to Revision 2.

This distinction in the About Box between Revision 2 and Updated to Revision 2
is to help determine whether System 7.5.3 Revision 2 pre-installed or updated on
the computer.

Additional information about System 7.5.3 Revision 2 is available in the Tech
Info Library articles, "Mac OS 7.5.3 Revision 2: Overview & Installation" and
"Mac OS 7.5.3 Revision 2: Fixes, Updates, Changes".
