Energy Saver: Causes CD-ROM Discs To Stop Playing (8/96)

Article Created: 14 August 1996

TOPIC ---

When I play an audio CD-ROM disc on my Power Macintosh 9500 computer, they play
for a while then stop. Then the AppleCD Audio Player resets to track 1, time
0:00. Why?

DISCUSSION ---

This is being caused by the Energy Saver control panel and will be fixed in a
future system update.

Note:
This affects all PCI-based Power Macintosh computers, not just the Power
Macintosh 9500 computer.

Workaround
=========

Step 1

Open the Energy Saver control panel.

Step 2

Deselect "Shutdown instead of Sleep".

Step 3

Close the Energy Saver control panel.
