CD Control Strip: Isn't Installed w/ Clean Install (2/97)

Article Created: 5 February 1997

TOPIC -----

I just did a clean install of 7.5.3 on my PowerBook 1400 and noticed that the CD Strip was not installed. I performed a complete install and it still is not there. How can I get it back?

DISCUSSION -----

The CD Strip is on the PowerBook 1400 CD-ROM System Software disc. It is located in the Install Apple Extras folder. You can install the CD Strip module by dragging it to the Control Strip Modules folder, which is located inside the System folder.
