Mac OS 7.6: Wacom Tablet (2/97)

```
Article Created: 7 February 1997

TOPIC -----------------------------------------------------------

This article describes running Mac OS 7.6 with a Wacom Tablet.

DISCUSSION ------------------------------------------------------

If you install Mac OS 7.6 on your computer with a Wacom tablet, make sure you
have the latest Wacom driver version 2.5.1 and remove the OpenTpt Serial
Arbitrator from your system. Wacom has an extension called SerialDMA which
replaces the OpenTpt Serial Arbitrator.

The Tech Info Library article titled "Locating Vendor Information" can help you
search for a particular vendor's address and phone number.
