Mac OS 7.6: Printers Aren't Appearing in Chooser (3/97)

Article Created: 03 March 1997

TOPIC -----

After installation of Mac OS 7.6 the Chooser window no longer shows any printers. How can I get my list of printers back?

DISCUSSION -----

It appears that you have inadvertently installed QuickDraw GX, which in turn disables all non-QuickDraw GX printers. If you use the Extensions Manager to disable the GX printer driver, the Chooser will be empty. Installing QuickDraw GX improperly may cause Type 1 Errors in the Finder.

Please follow the instructions from the Tech Info Library article titled "QuickDraw GX: How to Remove".

The QuickDraw GX 1.1.5 Installer is located in the "Software Installers" folder on the Mac OS 7.6 CD-ROM.
