## Kanji 6.0.7 and 6.0.7.1: Use U.S. Backlit Portable INIT (7/94)

Article Created: 19 November 1991

Article Reviewed/Updated: 13 July 1994

TOPIC -----

Is a localized version of the Portable CDEV available for Kanji 6.0.7 that supports backlit Portables? The Portable CDEV in the Kanji system 6.0.7 on Developer CD Vol. VIII is localized, but doesn't support backlit Portables, it is for contrast only. I moved the U.S. English Portable CDEV v1.3 over to Kanji 6.0.7, and it works, but I can't find one that is both localized AND supports backlighting.

DISCUSSION -----

You're right. The Backlit Portable INIT wasn't localized in Japanese (current versions of system software, 6.0.7 and 6.0.7.1). So to use KanjiTalk on the Backlit Portable, you'll need to use U.S. Portable INIT to control the screen brightness.
