LaserWriter Driver 6.0: Defaults to Color

This article last reviewed: 9 August 1989

TOPIC ---

I am using the new (v6.0) LaserWriter drivers with QMS printers. Printer
options default to color/grayscale under these drivers (as opposed to black and
white). This seems to slow printing. Is there any way to change this default?

DISCUSSION -------------------------------------

The primary focus for the LaserWriter 6.0 driver is color printing. This is
why the color option is the default setting. There is currently no way to
change the default setting to black and white.
