System 4.2 / Finder 6.0: It Can Corrupt Fond Resources

Article Created: 13 February 1991
Article Last Reviewed: 6 November 1991
Article Last Updated: 6 November 1991

TOPIC -----

This article describes font problems that may occur with System 4.2, Finder 6.0, and LaserWriter 5.0.

DISCUSSION -----

There is a problem in the new system software (System 4.2, Finder 6.0, and LaserWriter 5.0) that sometimes corrupts the Fond resource. This can cause inconsistent results when documents are created under older system software then opened or printed under the new system software.

To correct the offending Fond resource, use Font D/A Mover 3.6 to remove the offending fonts (all sizes), and reinstall them. This forces the font table to be recreated.

Another solution would be to update to a current version of System Software.
